Profile

I have worked for [EasyUse](#) as a programmer for 4 years. I helped corporations in banking, securities, investment and insurance industries to build or customize their e-billing or email marketing system with ASP.NET WebForm, I also helped Health Checkup Center of Taiwan Adventist Hospital to build their medical report system.

I've also worked for [Moshi](#) for the past 7 months, my responsibilities included developing internal systems and upgrading their official website with .NET Core and cloud services in Azure and AWS.

I'm a fast learner and also have strong problem-solving skills. Compiling and organizing solutions I find for a problem into notes or presentations is also one of my strengths. For example, I introduced GIT to my company, shared my knowledge and learning of it in meetings, and taught my fellow engineers the best practice of it.

In addition, I undertook a position in the welfare committee of my company for a year, during which I planned outdoor team building activities, and held board games and Switch parties. For me, having strong bond with colleagues and having fun during work is equally important to getting my job done well!

Skills/Tools

📁 Front End

- Html/CSS
- Bootstrap
- jQuery
- Ajax

🔗 Back End

- .NET Core 3.1
- ASP.NET WebForm
- ASP.NET MVC 5
- ASP.NET Web API
- ASP.NET Console
- ASP.NET Windows Form

🗄 Database

- MSSQL (SSMS)
- Oracle (SQL Developer)

☁ Cloud Service

- Azure App Service
- Azure SQL Database
- SendGrid in Azure
- Amazon SNS

🔗 Version Control

- Git
- GitHub
- BitBucket
- SourceTree
- TortoiseGit
- TortoiseSVN

📋 Project Tracking

- Jira
- FishEye
- Confluence

Education/Experience
